

# Atomos Ninja Blade

## Basics

- **How do I turn on the device?**
  - Attach a charged battery to slot #1
    - This is the start up slot (the slot on the right)
  - Hold the button on the right side of the device to turn it on
- **How do I record to the SSD?**
  - Put the SSD drive inside the Caddie (it should already be in it)
    - The SSD must be secured inside the Caddie with screws
  - Slide the Caddie into the open slot on the left side of the Ninja Blade
  - The Caddie should be inserted facing the same direction as the photo below

- **How do I connect the device to the camera?**

- You need an HDMI to HDMI cable
- If your camera takes in a mini HDMI, then you need an HDMI to mini HDMI cable
- Connect one end of the HDMI cable to the camera and the other end to the “IN” on the device

## **Functionality**

- **I don't see Ninja Blade user interface on the device.**

- Simply tap the screen and the user interface should appear on the screen
- Tap the screen once again to make the user interface disappear

- **How do I format the SSD?**

- Click on the image that looks like a SSD at the top right of the screen
